

April 6, 2009

To whom it may concern,

This letter is my personal recommendation for Jason Noble. I have been Jason's immediate supervisor for all of the years Jason has been employed by Gupta Permold Corporation.

I first became acquainted with Jason when I needed some graphics work done on a free lance basis. I was impressed with his skills so I continued to give him more and more work and then soon hired Jason full-time. Jason is an accomplished graphics designer. He is excellent at creating and manipulating images and graphics in Adobe PhotoShop. Most of our work was based for the web and Jason's work always makes our website sizzle. Jason was also our Web Developer. Jason is proficient with writing HTML code, Adobe Flash and Search Engine Optimization. He has worked hard to continually increase his web development skills over the years. Our online store grew tremendously through the years Jason was with us. Along with my direction, Jason was the hands-on person doing all of the work.

I also had the pleasure of creating an Employee Training Video with Jason. We shot and edited the entire piece complete with narration and graphics. The piece was a real hit and really showed Jason's breadth of technical and artistic skills.

I recommend Jason for employment.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Anil Gupta', with a long, sweeping horizontal line extending to the right.

Anil Gupta  
General Manager
